Sex Male | Date of birth 04/01/1973 | Nationality Italian

## CURRENT POSITION

Associate Professor of Applied Thermodynamics and Heat Transfer  
University "G. d'Annunzio" of Chieti-Pescara (Italy)  
2016 - present

## WORK EXPERIENCE

- 01/10/2016 - Present **Associate Professor of Applied Thermodynamics and Heat Transfer (ING-IND/11)**  
University "G. d'Annunzio" of Chieti-Pescara (Italy)  
Department of Engineering and Geology (INGEO)  
42, Viale Pindaro, 65127, Pescara (Italy)
- 01/11/2012 – 30/09/2016 **University Researcher of Applied Thermodynamics and Heat Transfer (ING-IND/11)**  
University "G. d'Annunzio" of Chieti-Pescara (Italy)  
Department of Engineering and Geology (INGEO)  
42, Viale Pindaro, 65127, Pescara (Italy)
- 21/12/2005 – 31/10/2012 **Engineering technician**  
Polytechnic University of Marche (Italy)  
Department of Industrial Engineering and Mathematical Sciences (DIISM)  
01, Via Brecce Bianche, 60100, Ancona (Italy)
- 01/11/2001 – 31/10/2005 **Research fellow in Applied Thermodynamics and Heat Transfer (ING-IND/10)**  
Polytechnic University of Marche (Italy)  
Department of Industrial Engineering and Mathematical Sciences (DIISM)  
01, Via Brecce Bianche, 60100, Ancona (Italy)

## EDUCATION AND TRAINING

- 01/11/1998 – 31/10/2001 **Ph.D. in Applied Thermodynamics and Heat Transfer**  
Polytechnic University of Marche (Italy)  
Department of Industrial Engineering and Mathematical Sciences (DIISM)  
▪ Ph.D. thesis defenced in date 04/12/2001
- November 1998 **Licensed in Engineering**  
Polytechnic University of Marche (Italy)
- 1992– 1998 **Master Degree in Mechanical Engineering**  
Polytechnic University of Marche (Italy)  
▪ Thesis defenced in date 04/11/1998 with a final grade of 110/110 *cum laude*

## ACADEMIC COURSES

- a.a. 2019 – 2020 **Applied Thermodynamics and Heat Transfer**  
**Acoustic and Lighting**  
University "G. d'Annunzio" of Chieti-Pescara (Italia)

a.a. 2018 – 2019	<b>Applied Thermodynamics and Heat Transfer Acoustic and Lighting</b> University “G. d’Annunzio” of Chieti-Pescara (Italia)
a.a. 2017 – 2018	<b>Applied Thermodynamics and Heat Transfer Acoustic and Lighting</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)
a.a. 2016 – 2017	<b>Applied Thermodynamics and Heat Transfer Acoustic and Lighting</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)
a.a. 2015 – 2016	<b>Applied Thermodynamics and Heat Transfer</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)
a.a. 2014 – 2015	<b>Applied Thermodynamics and Heat Transfer Acoustic and Lighting</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)
a.a. 2013 – 2014	<b>Applied Thermodynamics and Heat Transfer</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)
a.a. 2012 – 2013	<b>Applied Thermodynamics and Heat Transfer Renewable Energies Production</b> University “G. d’Annunzio” of Chieti-Pescara (Italy)

#### ACADEMIC ROLES

---

**Chairman of the Bachelor’s Degree in Building Engineering L23**

from 29/11/2019 for the 2019/2020 – 2021/2022 triennium

**Member of the “Research Committee” of the University “G. d’Annunzio”**

18/09/2019 - present

**Representative of Energy Workgroup for the “Italian University Network for Sustainable Development (RUS)” of the University “G. d’Annunzio”**

15/04/2019 - present

**Member of the “Committee for Research Evaluation and Technological Transfer (CVRTT)” of the University “G. d’Annunzio”**

10/04/2019 - present

#### RESEARCH PROJECTS

---

- Participation to the ReLUIS project from 24/02/2017
- Participation to the POWERED Project ("Project of Offshore Wind Energy: Research, Experimentation, Development") Adriatic IPA Cross Border Cooperation 2007-2013 Programme
- Participation to the "Industria 2015 - Generator Project" financed by the Italian Ministry of Economic Development. Proposal for "Energy Efficiency" – cod. EE01\_00054.
- Participation to PRIN 2007: "Innovative techniques for the forced convection heat transfer increase".
- Participation to PRIN 2005: "Innovative techniques for the forced convection heat transfer increase".
- Participation to PRIN 2002: "Techniques for the increase of the forced convection heat transfer".
- Participation to PRIN 1999: "Techniques for the efficiency increase of thermos-fluid dynamic processes".

## RESEARCH ACTIVITIES

### HEAT TRANSFER

Study, by means of infrared thermography, of the convective heat transfer coefficient of small aspect ratio liquid cooled pin fins. Results of this research was published on international journals and offer experimental correlations for the design of small aspect ratio pin fins by varying the Reynolds number and the pin shape geometry.

### THERMO FLUID-DYNAMIC OF EXTERNAL FLOWS

This research was aimed to analyse the local laminar boundary layer separation phenomenon named "Laminar Bubble". This is normally observed on aerodynamic surfaces operating at low Reynolds numbers and also on wind turbine blades. My research began with the development of an innovative thermographic approach able to qualitatively analyse the Laminar Bubble phenomenon and then became to a quantitative analysis. This research was published on several international papers and was also illustrated to international conferences.

### ENVIRONMENTAL FLUID DYNAMIC

This research was aimed to analyse interactions among wind, buildings and complex terrains. My research was preliminary focused to set up all the experimental facilities available at the Environmental Wind Tunnel of the University of Ancona, later to the experimental analyses of several wind-structures interactions. These researches were published on international journals and conference proceedings.

### THERMO FLUID-DYNAMIC OF INTERNAL FLOWS

This research was focused on the numerical and experimental analysis of the Ranque-Hilsch vortex tube. Numerical results were published on international journals and conference proceedings.

### WIND TURBINE ANALYSIS

My research was focused on horizontal and vertical axis wind turbines. A coupled experimental and numerical approach was developed to better analyse their fluid dynamic behaviour. The results of this research were published on international journals and conference proceedings.

### WIND ENERGY ASSESSMENT

My research was devoted to developing a meso/micro-scale numerical approach able to offer a complete wind energy assessment. Several custom scripts were realized to obtain wind maps, virtual mast anemometers and statistical wind roses for every point of the simulated domains. Results of this research were presented at several international conferences and some papers are, at present, under peer review of international journals. A large part of this research was developed in acknowledgment to the POWERED IPA-European Project. Neural networks combined with the meteorological numerical approach were used to produce short term forecasts of wind farms energy production.

### SOLAR ENERGY ASSESSMENT

This research was developed in parallel with the wind energy assessment by using the same MM5 meteorological code but with different post processing scripts, to analyse different output parameters. The aim of this research was focused on energy forecast for photovoltaic systems.

### BUILDING THERMAL ANALYSES

Another field of research developed from my master degree to now is concerning about thermal analysis of building structures by means of experimental techniques, like thermography, and of numerical approaches.

### ACOUSTIC ANALYSES

Since 2006 I have begun to deal with acoustic issues by analysing the interactions between sound waves and fluid dynamics of wind sections. Subsequently, acoustic analyses have been extended to noise measurements in wind farms, also with predictive simulations of the wind impact of multi megawatt wind turbines. Since 2012 they were activated research lines inherent to noise in work environments, to the reduction of noise emissions from gas turbine systems, to acoustic building

phenomena and to the acoustics of the theatres and churches.

## ADDITIONAL INFORMATION

### Certifications

- **3° Level RINA operator in “Acoustics and Vibrations”** (September 2016) Level 3 non-destructive testing operator in accordance with UNI EN ISO 9712 last edition and RINA RC / C.14 regulation. In the Acoustic and Vibration Method. Validity from 06/06/2016 to 06/06/2021
- **“Competent Engineer in Environmental Acoustics”** in accordance with paragraphs 6 and 7, Article 2 of Law 26/10/1995 n. 447 by decree of the Manager of P.F. Protection of the Environmental Resources of the Marche Region n. 88 of 10/07/2015

### Specialisation Courses

- DesignBuilder Detailed HVAC & CFD (Pescara, 14-16 February; 26 March 2018)
- DesignBuilder (Pescara, 17-18 March 2015).
- STAR-CCM+ for thermo-fluid dynamics (Ancona 26-28 January 2010).
- Labview DAQ advanced course (Ancona 4-6 December 2007).
- 5° UIT Summer School on “Turbulent flows thermo-fluid dynamics” (Certosa di Pontignano, 4-10 September 2005).
- Flovent and Floterm basic courses (Ancona, 10-12 September 2003).
- 4° UIT Summer School on “Experimental techniques in thermo-fluid dynamics” (Certosa di Pontignano, 1-6 September 2003).
- Labview DAQ intermediate course (Ancona, 27-29 January 2003).□
- Labview basic course (Ancona, 4-6 November 2002).□
- 3° UIT Summer School on “Computational thermo-fluid dynamics” (Certosa di Pontignano, 2-8 September 2001).
- Short Course of Prof. Avram Bar-Cohen in the “Workshop on the thermal investigations of ICs and microstructures (THERMINIC 99)” (Roma, October 1999).
- 2° UIT Summer School on “Two-phase thermo-fluid dynamics” (Certosa di Pontignano, 30 August - 3 September 1999).

### Informatics Competences

- Programming Languages
  - Labview
  - Visual Basic
  - Matlab
  - Fortran
  - Php
  - NCAR Command Language
- Software applications
  - Computer Aided Design: Autodesk Autocad / Solid Edge / Autodesk Revit
  - Meteorological codes: MM5 / WRF
  - Wind Energy Assessment: Windfarm / Windsim
  - CFD Simulations: Fluent / Floterm / Flovent / STAR-CCM+ / DesignBuilder
  - Geomapping: Mapinfo / GlobalMapper / Grass
- SO: Microsoft Windows / Linux / MacOS
